DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim(s) 1-12, drawn to a digital camera, which includes a display, a detector for detecting environment light and a corrector for correcting image display is classified in class 348, subclass 333.01.
 - II. Claim(s) 13-18, drawn to an electronic camera, which includes a first and second display device, a controller for changing a display state of at least one of said first and second displays is classified in class 348, subclass 333.11.
 - III. Claim(s) 19-21 drawn to an electronic camera, which includes a flash is classified in class 348, subclass 371.
 - IV. Claim (s) 22-24 drawn to an electronic camera, which includes a gain adjustment for the image display, is classified in class 348, subclass 255.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an electronic camera having a preview display and a second display (EVF), which does not list the features listed in group I, invention III has separate utility such as an electronic camera having a flash and invention IV has separate utility such as an electronic camera having a gain adjustment. See MPEP § 806.05(d)

Art Unit: 2615

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that a reply to this requirement must include an identification of the group that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yogesh K Aggarwal whose telephone number is (703) 305-0346. The examiner can normally be reached on M-F 9:00AM-5:30PM.

Art Unit: 2615

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Christensen can be reached on (703) 308-9644. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
